

SIMAGCHEM

Your Partner For Chinese Market

SIMAGCHEM CORPORATION

Corporation

SIMAGCHEM was established in 1996. We are a dynamic and innovative chemical supplier company based in China. In term of our teamwork and EPR-BDL database, we are professional and successful in association with our principal partners providing our market intelligence to evaluate best suitable sources and JIT quick response system.

The company vision is to be a bridge between East-West trade in chemicals.

Service

As a reliable partner in China, we are specialized in bulk specialty chemicals. Consolidating sourcing, marketing, sales distribution and quality-control sections, we provide our partners with a full service of sourcing evaluation, regulation affair support, custom synthesis/contract manufacture for outsourcing, investment solution and suitable partnership establishment in China.

SOURCING

CUSTOM MANUFACTURE

QUALITY CONTROL

REGULATION COMPLIANCE

Electronic chemical

Product Name	Application
Lithium hydroxide	Used as analytical reagents, photographic developer, but also for the manufacture of lithium
Ammonium Chloride	Mainly used in batteries, ammonium salt, tanning, electroplating, medical, photography, electrodes, adhesives, etc.
Valeryl chloride	Acylation agent for organic synthesis, used as liquid crystal and pharmaceutical intermediates.
EDTA Disodium	used as Aminoxatyl complexing agents, also for the pharmaceutical industry and color development
Tetrabutylammonium hydroxide 40% methanol solution	cleaning agent of electronics industry
Hexa Chloro Platinic Acid	used for and precious metal plating and production for catalysts of the major precious metal
1H-Benzotriazole	Widely used as inhibitors in metal rust and corrosion
Potassium thiocyanate	Used in the electroplating industry as a stripping agent, refrigerant
N-(3-Chloro-2-Hydroxypropyl)	Cationic surfactants
Disodium Methanedisulfonate	As electroplating additive
Manganese Dioxide	Mainly used as a depolarizing agent in dry cell
Hypophosphorous Acid	Used in electroplating baths. Pharmaceuticals. Reductant. General reagents
Methacrylic Acid	control rods in the production of nuclear reactor
Lithium chloride	raw material for manufacturing welding materials, air-conditioning equipment and lithium
Nickel Sulphamate	For the electronics industry
Sodium Methanesulfonate	for electroplating and other electronics industry

Electronic chemical

Product Name	Application
Sulphonic Acid(Labsa-12) 96%	Curing catalyst, for the preparation of a variety of liquid and solid detergents
4-pentylphenol	Used as liquid crystal materials and intermediates
Octylamine	Used as intermediates of medicine and liquid crystal materials
Chloroethylene Carbonate	Intermediates
Tetraethoxysilane	Primarily used for optical glass, chemical-resistant coatings and heat resistant coatings and adhesives
Barium Chloride Anhydrous	Mainly used metal heat treatment, barium salt manufacturing, electronic instruments, and as a water softener, used as a dehydrating agent and analytical reagents are used for machining heat treatment

Customer Service Lines:

Tel: 0086 592 2680277 / 275 / 654 / 279

Fax:0086 592 2680237
